

IN THE DRAWINGS

Please add accompanying Figs. 8 - 11. No new matter is entered, as the added drawings simply show what was Claimed in the Original Application.

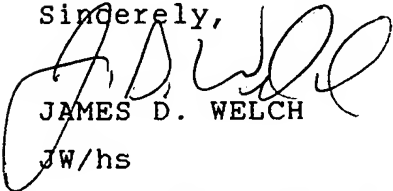

DISCUSSION

A Terminal Disclaimer is accompanying herewith, and New Sheets of Drawings showing added Figs. 8 - 11 which show substrates which face laterally rather than upward.

Claims 1 and 4 are Amended to require display of the results of practicing the Method. Exemplary support therefore is found in Fig. 7. It is hoped that, in view of the break with decades of tradition this new interpretation of Section 101 entails, that the Examiner will allow this approach to overcoming the rejection. I will comment that it really is unfair to retroactively change things like this in mid-stream.

It is believed that the problems are overcome by this submittal. Therefore the Examiner is respectfully requested to provide the Notice of Allowance and Issue Fee Due. Should problems remain please contact me at the letterhead location.

Sincerely,

JAMES D. WELCH
